“The rate of learning in the organisation must be equal to, or greater than, the rate of change.”

Agenda & Learning Objectives

- Your story
- Where do we start and what do we need?
- Demo 1: Record a process in ALM
- Demo 2: Publish a video
- Demo 3: Create a process guide
- Demo 4: Create a practice lesson
- Where shall we host the content?
- Additional use cases
- Summary

Your Story

You are a Software Tester working in a team in a medium sized organisation.

The Management Team have decided that you and your team should start a knowledge repository.

So Where Do We Start and What Do We Need?

- ? Something to capture keystrokes and mouse clicks
- ? Something to take screenshots
- ? Something to write instructions
- ? Some kind of video
- ? Some kind of audio or voiceover
- ? Some kind of labs
- ? Some kind of platform to store it all on.

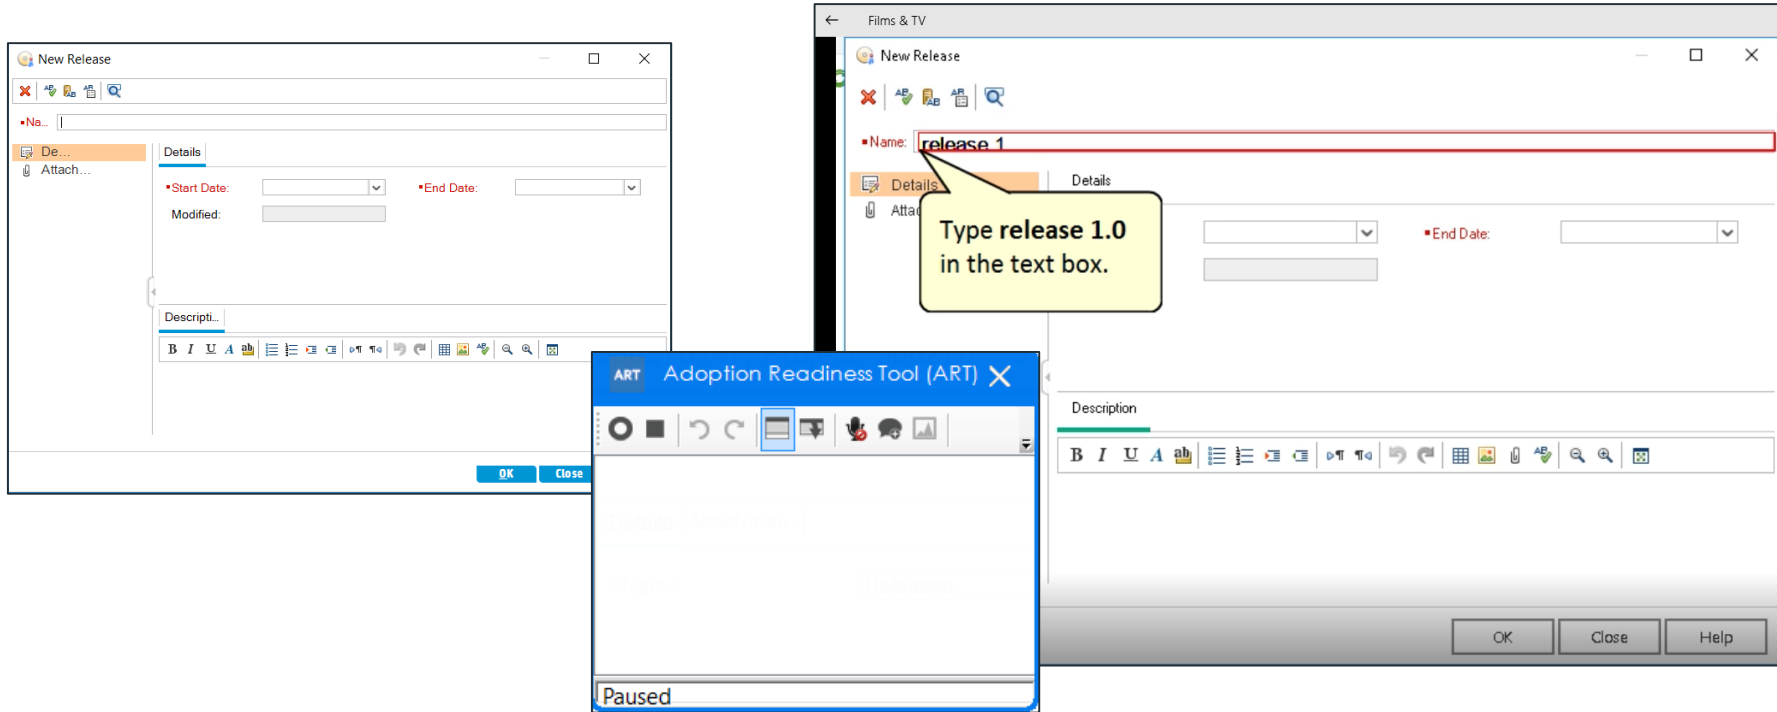

Demonstration 1: Record a Process in ALM

The image displays two screenshots of the HP Application Lifecycle Management (ALM) interface, demonstrating the process of recording a new release.

Left Screenshot: The ALM interface is shown with the 'Releases' section selected in the left-hand navigation pane. The 'New Release' button is highlighted in the top toolbar. A yellow callout bubble points to this button with the text: "Click the New Release... button."

Right Screenshot: The 'New Release' dialog box is open, showing the 'Flight Reservation' process selected in the 'Process' list. The 'Name' field is set to 'Flight Reservation'. The 'Description' field is empty. The 'Paused' status is indicated at the bottom of the dialog box.

Demonstration 2: Publish a Video

Demonstration 3: Create a Process Guide
