# BDD with Gherkin – One language for the whole LiveCycle

**Behavior Driven Development** (**BDD)**

The goal of BDD is a business readable language that allows you to describe a behavior without explaining how that behavior is implemented in detail
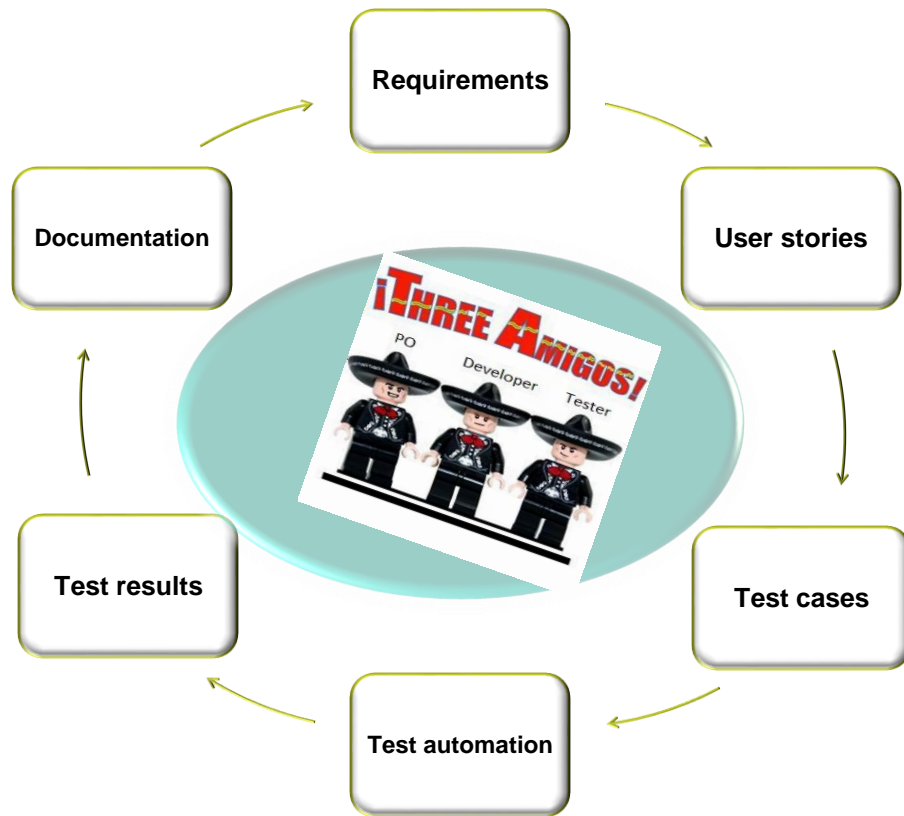

**Gherkin** is a common language which helps you to describe such business behavior

**Example:**

**Given** she comes to the login page

**When** she login with correct UID & PW

**Then** she is logged in securely

# OUR POSSIBLE TRANSITION SCENARIOS

We evaluated three option to facilitate the onboarding from the current standard solution ALM.NET to ALM OCTANE, in order to have a smooth transition between solutions.

## SYNCHRONIZE

- BUILD A SYNCHRONIZATION BETWEEN ALM.NET AND ALM OCTANE
- OPTIMAL FOR THOSE WHO ARE NOT PLANNING TO LEAVE ALM.NET (E.G DUE TO USAGE OF BUSINESS PROCESS TESTING)

## MIGRATION

- DATA MIGRATION FROM ALM.NET TO ALM OCTANE, TRANSFERING ALL REQUIREMENTS, TEST CASES AND DEFECTS
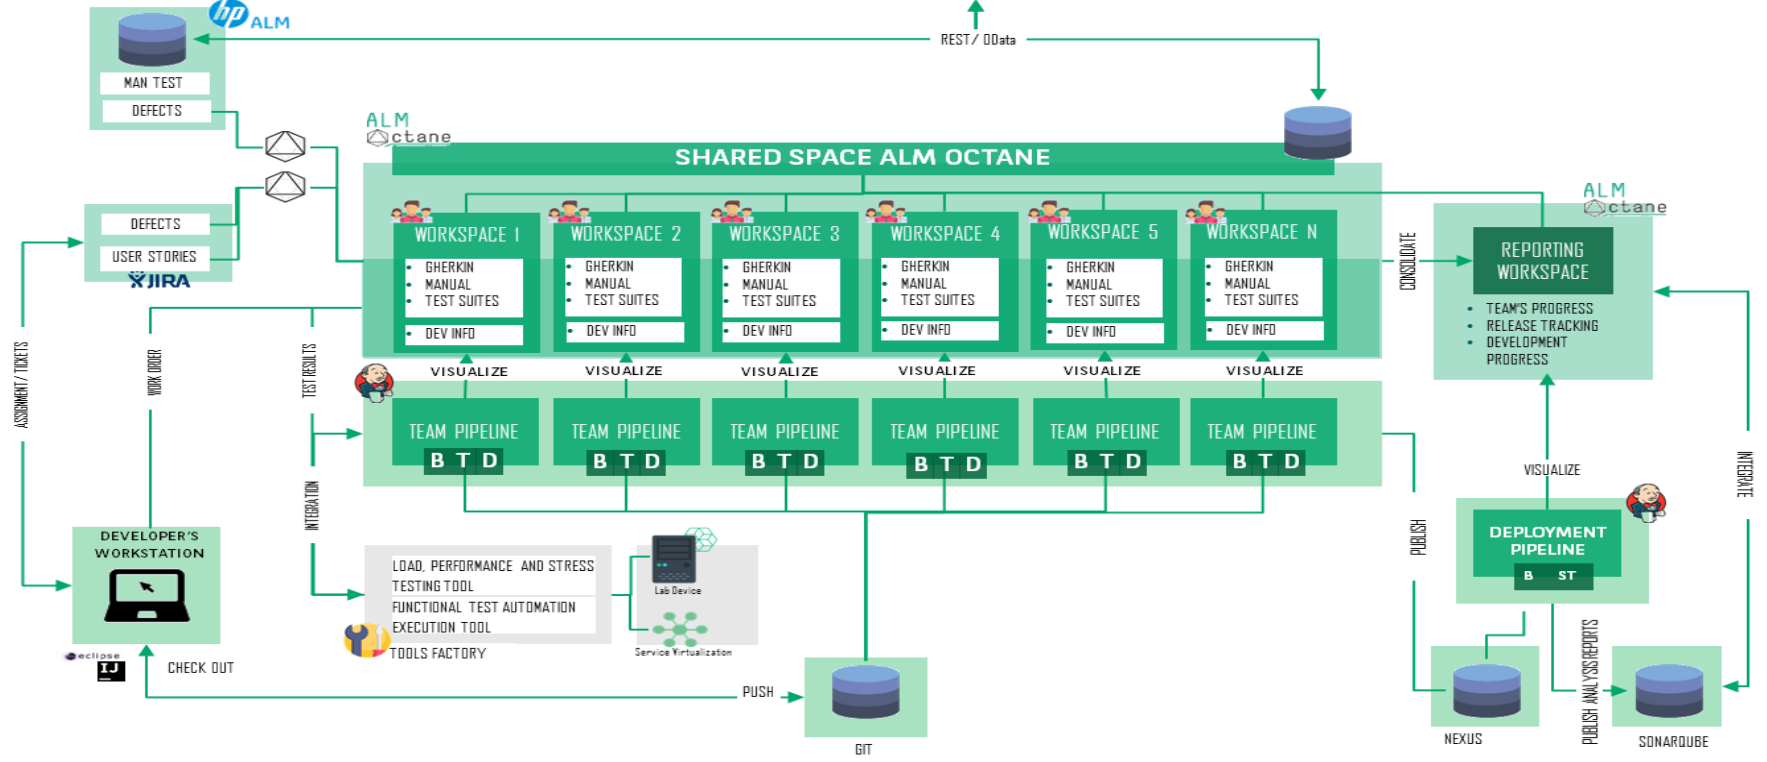

## GREEN-FIELD

- START FRESH ON ALM OCTANE
- GIVE A CHANCE FOR BUSINESS TO REBUILD THEIR PROCESS ON THE NEW TOOL
- THE MATURITY LEVEL OF THE TEAM IN THE CONTEXT OF AGILE WORKING SHOULD BE CONSIDERED

# POSSIBLE INTEGRATION OF THE TOOL CHAIN WITH ALM OCTANE
